Anthropic opens its most powerful AI models to more security teams

Source: Reuters (via Investing.com) | Urgency: HIGH | 2026-10-06T15:03:00-04:00

Anthropic has expanded its Cyber Verification Program (CVP) to include more security teams, allowing them to access its most powerful AI models for critical tasks. The program, which was previously limited to a select group of partners, now includes Glasswing, a security firm that has been using Anthropic's models for over 129,000 hours. Anthropic also provides 5,500 hours of access to its models for critical tasks, and 33,000 hours for high-priority incident response and Red Team penetration testing. The program is designed to help security teams detect and respond to threats more effectively, and to ensure that their AI models are used in a responsible and secure manner. Anthropic's CVP is a key part of its commitment to transparency and accountability, and it is a testament to the company's leadership in the AI security space.

Mistral's new 1T model aims to leapfrog closed and open rivals [BREAKTHROUGH]

Source: TechCrunch | Urgency: HIGH | 2026-10-07T04:33:00+07:00

Mistral AI has unveiled its new 1T model, Mistral Large 4 (ML4), which aims to leapfrog its closed and open rivals. The model is designed to be more powerful and efficient than its competitors, and it is expected to be a game-changer in the AI industry. Mistral AI's CEO, Pierre Stock, said that the company is committed to transparency and open weights, and that the ML4 model is a key part of its strategy. The model is designed to be used in a wide range of applications, from natural language processing to computer vision, and it is expected to be a key player in the AI security space. Mistral AI's ML4 model is a testament to the company's commitment to innovation and leadership in the AI industry.
