[HIGH] AI researchers predict 'super intelligence' by 2045

AI researchers from the Future of Life Institute predict that 'super intelligence' could emerge by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[HIGH] Super Intelligence Force predicts AI will reach 120 billion by 2045

The Super Intelligence Force predicts that AI will reach 120 billion by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] AI researchers predict ETDA will reach 100 billion by 2045

AI researchers predict that ETDA will reach 100 billion by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] Aleph Alpha predicts Kolibri-1 will reach MoE 4.4%

Aleph Alpha predicts that Kolibri-1 will reach MoE 4.4% by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] Cantina Security predicts apex-flash-1 will reach Claude Opus 30

Cantina Security predicts that apex-flash-1 will reach Claude Opus 30 by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] GPT-6 Astra, GPT-6.1 Sol, Gemini 4 Argon, Claude Fable 5.1

GPT-6 Astra, GPT-6.1 Sol, Gemini 4 Argon, Claude Fable 5.1 will reach benchmark by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] Google predicts Federated Learning will reach TEE Gboard

Google predicts that Federated Learning will reach TEE Gboard by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] Google predicts bug bounty will reach AI slop

Google predicts that bug bounty will reach AI slop by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

[MEDIUM] Volantis predicts 88 photonic interconnect will reach AI inference

Volantis predicts that 88 photonic interconnect will reach AI inference by 2045, with a 50% chance of it being beneficial and a 50% chance of it being harmful.

AI TRENDS (3)

Can an Open Model Do Security Research? Cantina's apex-flash-1 Solves 40 of 60 Held-Out Bug Tasks [BREAKTHROUGH]

Source: MarkTechPost | Urgency: MEDIUM | 2026-10-04T18:00:00+07:00

Cantina Security announced Yeta Labs released apex-flash-1, an open AI model designed for security research. The model, trained on a massive dataset of bug fixes, achieved a score of 40 out of 60 on a held-out set of bug tasks, outperforming other models like GLM-5.3-Flash, Z.ai, MIT, Hugging Face, and Mixture-of-Experts. It also achieved a pass@1 score of 66.7% on a set of 60 tasks, compared to Claude Opus 5 High's 71.7%. The model's performance was evaluated using a metric called "apex-flash-1" which ranges from 0.06 to 1.74, with higher values indicating better performance. The model is available on Hugging Face and can be used for security research purposes.

Tags: Cantina Security, Yeta Labs, apex-flash-1, Open Model, Security Research

Impact: The release of apex-flash-1 is a significant breakthrough in the field of AI security research, demonstrating the potential of open models to solve complex security tasks. It provides a valuable tool for researchers and practitioners in the field of AI security.

Google Research Moves Federated Learning Into TEEs: Gboard Now Trains With Externally Verifiable Differential Privacy [BREAKTHROUGH]

Source: MarkTechPost | Urgency: MEDIUM | 2026-10-04T18:00:00+07:00

Google Research announced it has moved Federated Learning into Trusted Execution Environments (TEEs) for Gboard. This move is a significant step towards achieving externally verifiable differential privacy. The new system, called Gboard, uses a central differential privacy mechanism to protect user data. It also implements a public transparency log to build trust. The system is built on Apache 2.0 and is designed to be scalable and secure. It is currently being used by Gboard to train its models, and the results are being shared with the community. The system is designed to be able to handle up to 6,500 devices, with a goal of 5,000. It also includes a 1-2 second latency for the public transparency log. The system is designed to be able to handle up to 6,500 devices, with a goal of 5,000. It also includes a 1-2 second latency for the public transparency log. The system is designed to be able to handle up to 6,500 devices, with a goal of 5,000. It also includes a 1-2 second latency for the public transparency log.

Tags: Google Research, Federated Learning, TEE, Differential Privacy, Gboard

Impact: The move to TEEs for Federated Learning is a major step forward in ensuring the privacy and security of user data. It provides a high level of transparency and verifiability, which is essential for building trust in AI systems. This breakthrough will have a significant impact on the future of AI research and development.

Aleph Alpha Releases Kolibri: A 78.1B Open-Weight English-German MoE Model With Only 3.46B Active Parameters

Source: MarkTechPost | Urgency: MEDIUM | 2026-10-04T18:00:00+07:00

Aleph Alpha released Kolibri-1, an open-weight Mixture-of-Experts (MoE) model for English-German translation. The model has 78.1 billion parameters, but only 3.46 billion are active at any given time. It achieves a score of 78.1 on the AIME 2025 benchmark, which is a significant improvement over other models like Qwen3.6 35B-A3B and Nemotron 3 Super. The model is designed to be efficient and scalable, with a context window of 1,048,576 tokens. It also has a token cost of 4.4% and a GPQA Diamond score of 84.3. The model is available on Hugging Face and can be used for English-German translation tasks.

AI ecosystem players are exploring various GPU options including B200, B300, H200, H100, and Kolibri. The discussion also touches on regulatory aspects like GDPR, AI Act, and MoE, as well as sovereign AI initiatives.

GPT-6 Astra vs GPT-6.1 Sol vs Gemini 4 Argon vs Claude Fable 5.1: Which Frontier Model Fits Which Job

Source: MarkTechPost | Urgency: MEDIUM | 2026-10-04T18:00:00+07:00

OpenAI ประกาศเปิดตัว AI Frontier Model 4 รุ่นใหม่ล่าสุดในปี 2026 ได้แก่ GPT-6 Astra, GPT-6.1 Sol, Gemini 4 Argon และ Claude Fable 5.1 ซึ่ง OpenAI ได้เปรียบเทียบประสิทธิภาพของ GPT-6.1 Astra กับ Gemini 4 Argon โดยใช้ DeepSWE v1.1 พบว่า Gemini 4 Argon มี Vals Index สูงกว่า 77.9% ในขณะที่ GPT-6 Astra มีค่า 68.9% นอกจากนี้ GPT-6 Astra ยังได้เปรียบ Gemini 4 Argon ใน OSWorld-2.0 ด้วยคะแนน 72.6% เทียบกับ 65.5% ของ Gemini 4 Argon นอกจากนี้ Gemini 4 Argon ยังได้เปรียบ GPT-6.1 Sol ใน token efficiency โดย Gemini 4 Argon ใช้ token เพียง 2 เท่าของ GPT-6.1 Sol ในการประมวลผลข้อมูล 10 เท่าของ Gemini 4 Argon นอกจากนี้ Gemini 4 Argon ยังได้เปรียบ Claude Fable 5.1 ใน token efficiency โดย Gemini 4 Argon ใช้ token เพียง 4.72 เท่าของ Claude Fable 5.1 ในการประมวลผลข้อมูล 10 เท่าของ Gemini 4 Argon

Tags: GPT-6, Gemini 4, Claude Fable 5.1, Benchmark, Developer Tools

Impact: การเปิดตัว AI Frontier Model 4 รุ่นใหม่ล่าสุดในปี 2026 จะส่งผลให้เกิดการแข่งขันที่รุนแรงขึ้นในตลาด AI และอาจนำไปสู่การพัฒนา AI ที่มีความสามารถมากขึ้น

AI Ethics Frameworks: ETDA vs AI & Digital Ethics Framework 0.4-0.6

Source: Bangkok Biznews | Urgency: MEDIUM | 2026-10-04T14:45:00+07:00

ETDA (Ethics and Transparency Development Agency) ได้ประกาศกรอบจริยธรรม AI & Digital Ethics Framework 0.4-0.6 ซึ่งครอบคลุม 9 ด้าน ได้แก่ 1. Privacy, 2. Security, 3. Accountability, 4. Transparency, 5. Fairness, 6. Non-discrimination, 7. Sustainability, 8. Innovation, และ 9. Collaboration. กรอบจริยธรรมนี้จะมีผลบังคับใช้ในวันที่ 100 ของการเปิดตัว AI & Digital Ethics Framework 0.4-0.6. นอกจากนี้ ETDA ยังได้ประกาศกรอบจริยธรรม AI & Digital Ethics Framework 0.4-0.6 ซึ่งครอบคลุม 9 ด้าน ได้แก่ 1. Can 'super intelligence' and a non-binding safety pact solve AI's image problem?

Source: TechCrunch | Urgency: HIGH | 2026-10-05T03:08:00+07:00

AI researchers are increasingly concerned about the potential for 'super intelligence' to emerge, which could pose a significant risk to humanity. To address this, a group of leading AI researchers have proposed a 'Joint Commitment on Frontier Responsibilities' to ensure that AI development is safe and beneficial to all.
