TOP INSIGHTS

[HIGH] Meta [illegible] Muse Spark Open [illegible] open-weight [illegible] [illegible] Mac Studio [illegible]

A large multimodal open-weight MoE from a US lab narrows the gap with Chinese open models and enables local frontier-class inference.

[HIGH] Anthropic [illegible] AI Worms [illegible] IoT [illegible] Smart Home [illegible]

A frontier lab publicly flags autonomous AI malware propagation as a realistic near-term IoT risk.

[MEDIUM] Ai2 [illegible] HiRO-ACEv2 [illegible] 3 [illegible]. [illegible]

AI emulators cut high-resolution climate simulation cost by ~300x, making extreme-weather risk modelling far more accessible.

[MEDIUM] Proofpoint [illegible] Varonis [illegible] 6,300 [illegible] [illegible] Data [illegible] AI Security

Data security and AI-agent security are consolidating into single platforms, signalling where enterprise security budgets are heading.

[MEDIUM] Modal [illegible] AI [illegible] 750 [illegible] [illegible] 1.57 [illegible]

Sandbox-style compute for agents is becoming a core AI infrastructure category with billion-dollar revenue.
